THE LEARNING JOURNEY

Emerging technologies are changing the way work is defined and carried out which requires workers to possess a different set of skills in the future. New learning platforms will create new opportunities to learn and assist in upskilling and reskilling employees, and in a **changing world**, new ways for education becomes ever more important. **Future of Work** is five-day Masterclass in Silicon Valley exploring **the tendencies of the future**.

The Future of Work Masterclass will take you through a journey exploring how **future technologies** and a changing world will impact learning, education, workforce and **leadership**. You will gain inspiration from American frontrunners on **how to address the challenges, opportunities** and the ethical considerations that comes with a changing world. Join and enable yourself to lead your organization towards the future of work!

MASTERCLASS

Silicon Valley, USA

April 27th – May 1st 2020

Five intensive days of inspiration and knowledge with unique insights from pioneers at the innovation epicenter: Silicon Valley.

PRICE: DKK 20.000 ex. VAT

WHY GO?

- To **UNDERSTAND** the challenges of new trends and technologies along with the opportunities within your field and organization.
- To actively work on your own case/challenge, based on **IDENTIFYING AND DESIGNING** Future of Work solutions.
- To **BECOME PART** of a strong Future of Work-based network across industries in Denmark and Silicon Valley.
- To **MEET AND ACQUIRE KNOWLEDGE** from corporations, institutions, startups and VC's based in the world's epicentre of technology.
- To gain **TOOLS AND SKILLS** to bring home to use strategically to navigate through and adapt to the ever-changing market.
